

# EPILOG LASER

# eVIEW™

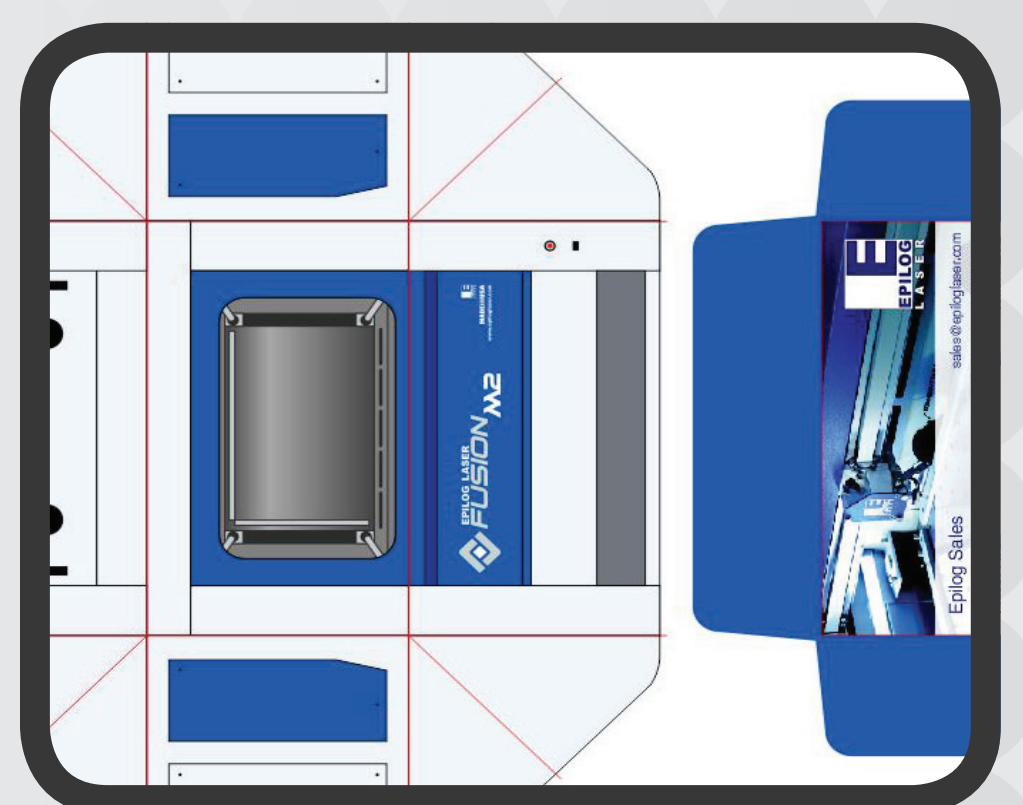

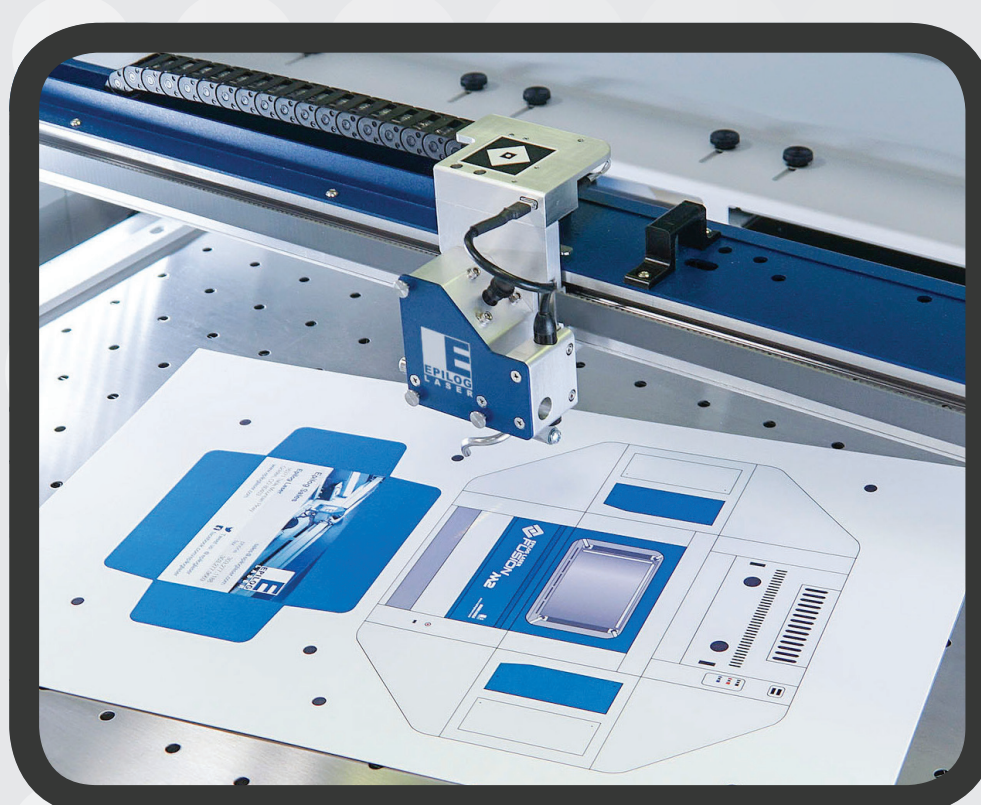

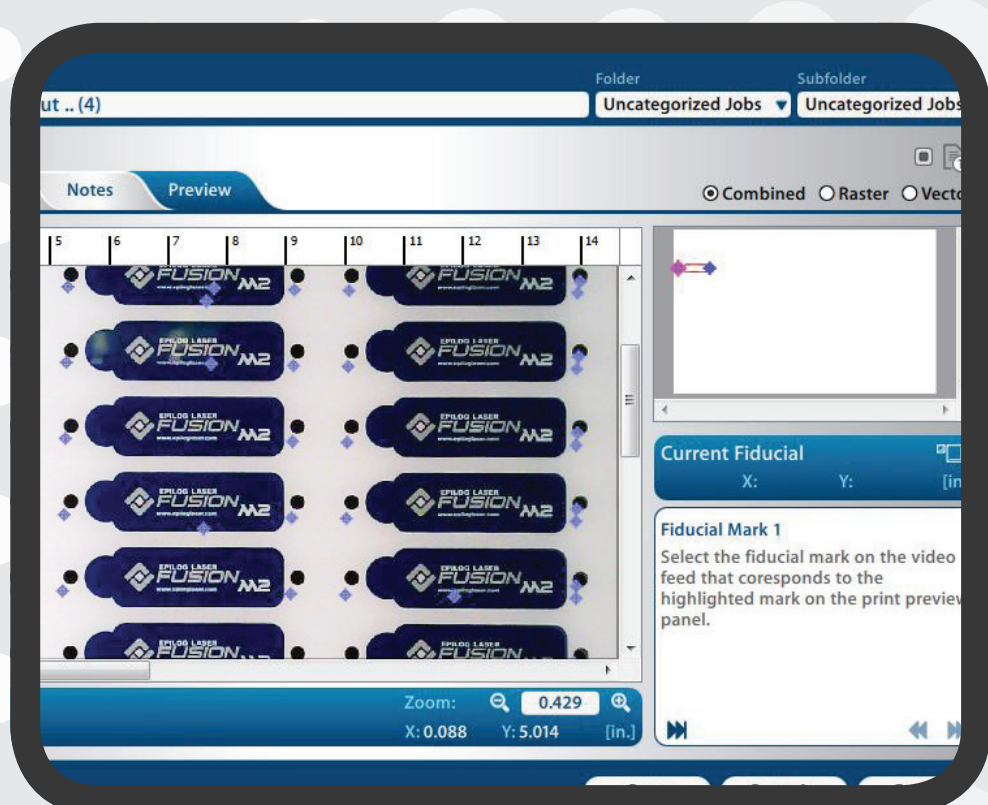

## Camera Module

### Exclusively for the Fusion M2 Laser System

## Add Laser Cutting to Your Printed Projects

- **Easy Project Setup:** Place your printed material on your laser table and open your Epilog Job Manager, which handles the entire alignment process automatically.
- **Real-Time Preview:** The Job Manager will show a real-time photo representation of the laser table with your printed graphic and its true position on the table.
- **Unprecedented Accuracy:** After the registration marks have been verified the laser will begin cutting out the pre-printed graphics with unmatched precision, leaving you with a beautifully finished product.
